

# EGG CARTON TURTLE

## TAKE AND MAKE

### Materials:

- 1 egg carton turtle shell
- green paint
- paint brush
- cotton swab (for glue)
- glue
- 1 green pom pom
- 2 googly eyes
- green construction paper
- scissors

### Directions:

- Paint the outside of the egg carton turtle shell with the green paint using the paint brush. Let it dry completely.
- If your turtle shell is uneven, you can have an adult help you trim the bottom of the shell so it sits evenly.
- The green pom pom will be the head of the turtle. Glue the two googly eyes to the pom pom. Then, glue the pom pom to the painted turtle shell wherever you would like the turtle's head to be.
- Cut out flippers for the turtle from the green construction paper template provided. Glue the flippers to the bottom of the turtle shell.
- Leave the turtle to dry, and then it is complete!
